WORK EXPERIENCE

Scrypt Ventures

Perth, Western Australia (Remote)

Junior Software Engineer

Mar 2026 – Present

- Performed full-stack engineering across a production healthcare payments platform spanning Angular web apps, NativeScript mobile, .NET 9 APIs, Azure cloud services, CI/CD, and operational tooling.
- Worked across the release path from code to production, contributing to Azure DevOps pipelines, Docker image publishing, AKS deployments, Azure Web Apps/static sites, and dev/UAT/prod configuration.
- Contributed to Auth0/Firebase authentication, payment workflows, REST/OpenAPI APIs, SQL Server/EF Core data access, background jobs, observability, and automation tooling.

AITAI - AI Institute

Perth, Western Australia

LaunchLAB AI Cohort One '26

Mar 2026 – May 2026

- Selected for LaunchLAB AI Cohort One '26, building AI-native products with model integration, real-time inference, and structured iteration with industry mentors.

Independent Contracting

Perth, Western Australia

Software Engineer

Jan 2026 – Mar 2026

- Built and shipped full-stack client applications serving hundreds of users, owning requirements, architecture, implementation, deployment, and support end-to-end.
- Worked directly with clients to scope, iterate, and launch production software on tight timelines.

Lightbulb Skills

Perth, Western Australia

Junior Software Engineer

Oct 2024 – Dec 2025

- Built and maintained a production CRM with Next.js, React, and PostgreSQL, owning schema design, UI, and iterative feature delivery.

EDUCATION

Curtin University

Perth, Western Australia

Computer Science Degree Major

Feb 2026 – Oct 2028

- High Distinction results in Unix and C Programming (COMP1000) 97, Data Structures and Algorithms (COMP1002) 93, and Programming Design and Implementation (COMP1007) 94.
- Letter of Commendation (Dean's List); completed first-year Mechatronic Engineering Honours / Computer Science coursework before transferring into Computer Science.

PROJECTS

Tactify (AI Accessibility Platform)

Personal Project

Jan 2026 – Present

- Built Tactify during Perth Hackerhouse, an AI accessibility platform that turns visual documents, worksheets, and diagrams into tactile-ready SVG graphics with guided audio narration for blind and low-vision users.
- Owned the system end-to-end across a Next.js / React product surface, Go backend, contract-first protobuf APIs, authentication, object storage, Dockerized infrastructure, and a Gemini/ImageMagick/vtracer/TTS processing pipeline.

Still

Open Source

Dec 2024 – Present

- Built a Rust-based project environment manager that turns development environments into typed, reviewable desired state through still.toml, lockfiles, and config mutations.
- Architected a multi-crate Rust workspace with CLI/TUI frontends, an async engine core, feature-gated package-source adapters, install planning, rollback-aware state recording, and SHA-256 trust enforcement.

SKILLS

- **Languages:** TypeScript / JavaScript, Go, Rust, Python, C / C++, C#, SQL, Bash
- **Full-Stack:** React & Next.js, Angular, SvelteKit, NativeScript, .NET / ASP.NET Core, REST/OpenAPI, protobuf
- **Data, Cloud & Tools:** PostgreSQL, SQL Server, EF Core, Docker, Kubernetes / AKS, Azure DevOps, Linux, Auth0 / Firebase
